## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year  
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year  
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$4.00 per year  
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year  
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$2.00 per year  
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50  
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50  
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents  
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents  
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-503 - Estimates of Employees by Province and Industry, 1961-64 - Price 50 cents  
(Estimates of total numbers of employees, monthly and annually, for major industrial division Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).
- 72-504 - Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics -- Historical Series, January 1961 - May 1965  
-- Volume I - Price \$4.50  
(This volume gives statistics revised to the 1960 Standard Industrial Classification and a 1961 time base for index numbers).

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

JANUARY 1970

(Data subject to revision)

Advance estimates indicate a decrease in the unadjusted composite index of employment from December to January, mainly resulting from seasonal declines in construction and trade. All regions recorded decreases.

Seasonally-adjusted, the composite index of employment rose slightly. Among the industry divisions the largest relative changes were a decrease in construction and an increase in trade. Other changes were small. All regions showed increases except Ontario which recorded a slight decline.

Average weekly wages and salaries at the composite level rose from December to January mainly as a result of return to normal activity following short-time associated with the year-end holiday season. All industry divisions showed increases with the largest relative gains recorded in manufacturing and construction. All regions showed increases.

P Preliminary figures.

December 1969

**EMPLOYMENT:** The unadjusted index of employment (1961=100) at 126.5 was 2.7 p.c. lower than the November index of 130.1 and was 3.1 p.c. higher than in December 1968. All industry divisions contributed to the decline with forestry and construction showing the largest relative decreases, 11.4 p.c. and 15.3 p.c., respectively. Widespread layoffs and absenteeism associated with the year-end holiday season were major factors. Seasonally-adjusted, the composite index showed virtually no change from 128.4 in November to 128.5 in December. Among the industry divisions, the largest relative changes were increases of 2.5 p.c. in forestry, 1.3 p.c. in mining, and 1.0 p.c. in construction. The rise in forestry was partially the result of greater than seasonal layoffs in November. For other industry divisions, there was little difference in the seasonally-adjusted indexes from last month. The regions showed little change in the adjusted composite indexes of employment.

The footnotes to the table below indicate some of the main factors underlying the larger variations from last month in the unadjusted indexes.

Percentage Changes from last month in Selected Series of Seasonally-adjusted and Unadjusted Employment Index Numbers, December 1969

Industry	Seasonally-Adjusted	Unadjusted for seasonal variation					
	Canada	Canada	Atlantic Region	Quebec	Ontario	Prairie Region	British Columbia

- (1) Relatively few employees in this region.
- (2) Layoffs and reduced activity associated with year-end holiday season.
- (3) Greater than seasonal layoffs last month.
- (4) Mainly in petroleum contract drilling; seasonal.
- (5) Temporary layoffs and shutdowns mainly due to holiday season.
- (6) In most components; seasonal.
- (7) Some layoffs last month.
- (8) Mainly in fish products; in British Columbia, also in fruit and vegetable canning.
- (9) In both components.
- (10) Mainly in water transport and services.
- (11) Mainly in hotels, restaurants and taverns.

**Note:** Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

Average Weekly Wages and Salaries - Average weekly wages and salaries at the composite level dropped \$4.33 from \$121.42 in November to \$117.09 in December.

The largest relative changes recorded were declines in construction (\$29.84), in forestry (\$6.65), and in manufacturing (\$4.72). Short-time and unpaid holidays mainly due to the year-end season were major contributing factors. Other changes were small. All regions showed decreases.

The footnotes to the table below indicate some of the main factors underlying the larger variations from last month.

Changes from last month in Selected Series of Average Weekly Wages and Salaries, December 1969

Industry	Canada	Atlantic Region	Quebec	Ontario	Prairie Region	British Columbia

(1) Relatively few employees in this region.

(2) Seasonal short-time and temporary shutdowns mainly due to holiday season; also some unpaid holidays.

(3) Wage increases.

(4) Mainly in saw, shingle and planing mills; short-time this month and some plant shutdowns - seasonal.

(5) Increase of employees in iron and steel mills and in smelting and refining where wages are above the primary metals average; also some overtime payments and wage increases.

(6) Decrease of lower paid employees - in several components.

(7) Short-time this month; some unpaid holidays.

(8) Increase of employees mainly in pulp and paper mills where wages are above the paper products average; also overtime payments.

(9) In both components - short-time associated with the year-end season; also some unpaid holidays.

(10) Mainly in water transport and services - short-time this month; seasonal.

(11) Decrease of employees in a component where wages are below the communications average.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments. The latest figures throughout this publication are subject to revision.

## NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

### The Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

### Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

### Definitions

#### Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

### Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

### Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

### Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

### Employment

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

### Average Weekly Wages and Salaries

The wages and salaries are derived from payrolls which include gross payments before deduction are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

### Organization of Data

#### The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

### Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year  
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year  
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$4.00 per year  
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year  
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$2.00 per year  
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50  
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50  
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents  
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents  
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-508 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents  
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).
- 72-510 - Labour Costs in Manufacturing 1968 - Price \$1.50 (Estimates of selected employer labour Costs, by industry group and area - Report prepared jointly by Labour Division of D.B.S and Economics and Research Branch of the Canada Department of Labour)

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

# EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

FEBRUARY 1970

(Data are subject to revision)

Advance estimates indicate little change in the unadjusted composite index of employment (1961=100) from January to February. Among the industry divisions, the largest relative changes were increases in mining and in service and a decline in trade. All other divisions showed gains except manufacturing which remained unchanged. With the exception of Ontario which recorded a slight rise, all regions showed decreases.

Seasonally-adjusted, the composite index of employment rose slightly. Most industry divisions recorded increases. In manufacturing, the adjusted index showed a small decline. All regions recorded a rise except British Columbia where there was a decrease.

Average weekly wages and salaries at the composite level rose from January to February. All industry divisions shared in the increase except finance, insurance and real estate where a decline was recorded. All regions showed gains.

JANUARY 1970

## Summary

**EMPLOYMENT:** The unadjusted index of employment (1961=100) at 124.4 was 1.7 p.c. lower than 126.5 in December and was 2.5 p.c. higher than in January, 1969. All industry divisions shared in the decline except mining, finance, insurance and real estate, and service which showed little change. This decrease was primarily the result of seasonal layoffs. Seasonally-adjusted, the composite index showed no change from 128.4 in December to 128.4 in January. Among the industry divisions, the largest relative changes were a decrease of 3.8 p.c. in construction and increases of 1.2 p.c. in both transportation, communication and other utilities and in trade. Among the regions, Quebec recorded a 1.1 p.c. increase and Ontario, a 0.7 p.c. decline; the others showed little change.

The footnotes to the table below indicate some of the main factors underlying the larger variations from last month in the unadjusted indexes.

Percentage Changes from Last Month in Selected Series of Seasonally-adjusted and Unadjusted Employment Index Numbers, January 1970

- (1) Relatively few employees in this region.  
 (2) Seasonal layoffs.  
 (3) Staff reductions; also some layoffs.  
 (4) New operation.  
 (5) Mainly in saw, shingle and planing mills.  
 (6) Greater than seasonal layoffs.  
 (7) Mainly in iron and steel mills.  
 (8) Some layoffs last month.  
 (9) Return to work following layoffs associated with holiday season.  
 (10) Mainly in special trade contracting.  
 (11) Mainly in highways, bridges and streets; seasonal layoffs.  
 (12) Mainly in department stores; seasonal layoffs of temporary employees.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments. The January figures throughout this publication are subject to revision.

Average Weekly Wages and Salaries: Average weekly wages and salaries at the composite level rose \$6.07 from \$116.87 in December to \$122.96 in January. All industry divisions contributed to the rise with the largest relative increases recorded in construction (\$29.38), in manufacturing (\$7.04), and in mining (\$6.01). These changes resulted mainly from the return to a normal work week following widespread short-time in December associated with the holiday season. Increases were recorded in all regions ranging from \$4.86 in the Prairie Region to \$6.61 in Ontario.

The footnotes to the table below indicate some of the main factors underlying the larger variations from last month.

Changes from Last Month in Selected Series of Average Weekly Wages and Salaries, January 1970

Industry	Canada	Atlantic Region	Quebec	Ontario	Prairie Region	British Columbia

(1) Relatively few employees in this region.

(2) Mainly in logging; decrease of lower-paid employees.

(3) Seasonal reduction in activity.

(4) Increased activity following short-time and some shutdowns associated with year-end holiday season.

(5) In various components; return to normal activity following seasonal short-time last month - also some wage increases and overtime payments.

(6) Start of new operation.

(7) Mainly in saw, shingle and planing mills; short-time last month mainly due to holiday season; return to normal hours this month with overtime payments and wage increases in several cases.

(8) Fewer hours worked this month.

(9) More hours worked this month; also wage increases and overtime payments in some instances.

(10) Decrease of employees mainly in pulp and paper mills where wages are above the paper products average; also overtime payments last month.

(11) More hours worked this month.

(12) Some overtime payments and wage increases.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments. The January figures throughout this publication are subject to revision.

TABLE 12. Average Weekly Wages and Salaries (in dollars), Urban Areas - Continued

## Industrial Composite

TABLE 12. Average Weekly Wages and Salaries (in dollars), Urban Areas - Concluded

## Industrial Composite

[illegible]

## NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

### The Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

### Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

### Definitions

#### Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

### Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

### Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

### Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

### Employment

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

### Average Weekly Wages and Salaries

The wages and salaries are derived from payrolls which include gross payments before deduction are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

### Organization of Data

#### The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

### Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year  
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year  
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$4.00 per year  
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year  
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$2.00 per year  
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50  
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50  
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents  
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents  
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-508 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents  
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).
- 72-510 - Labour Costs in Manufacturing 1968 - Price \$1.50 (Estimates of selected employer labour Costs, by industry group and area - Report prepared jointly by Labour Division of D.B.S and Economics and Research Branch of the Canada Department of Labour)

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

MARCH 1970

The advance estimate of the unadjusted composite index of employment indicates no change in March over February 1970. Construction, manufacturing and mining recorded decreases and the remaining industries shown, gains. All regions reported decreases except Quebec and British Columbia where small increases occurred and the Prairie Region which showed no change.

Seasonally-adjusted, the composite index of employment indicated a decrease. With the exception of finance, insurance and real estate which increased, all the industry divisions declined. All regions recorded decreases except the Atlantic region which showed no change and Quebec which increased.

Average weekly wages and salaries at the composite level were lower in March than February 1970. Decreases were recorded in construction, manufacturing and services, and increases in the remaining industries shown. All regions reported decreases except British Columbia, where a slight gain was recorded.

Additional industry and area detail other than that presented in Table A for March 1970 is not yet available.

<sup>p</sup> Preliminary figures.

FEBRUARY 1970

Employment - The unadjusted index of employment for the industrial composite at 124.1 was 0.2 p.c. lower in February than in January 1970 and 2.3 p.c. higher than in February 1969. Decreases were recorded in forestry, trade, transportation, communication and other utilities and construction and increases in the remaining industries. All regions recorded declines except Ontario where a small increase occurred and British Columbia which showed no change. Seasonally-adjusted, the composite index of employment increased 0.2 p.c., from 128.6 in January to 128.8 in February 1970. Increases were recorded in all industries except transportation, communication and other utilities which declined slightly and manufacturing which showed no change. Increases in the remaining industries ranged from 0.2 p.c. for service, trade and finance, insurance and real estate to 1.0 p.c. for mining. Increases were recorded for Ontario (0.7 p.c.) and Quebec (0.1 p.c.), and the remaining regions showed declines ranging from 0.2 p.c. for the Prairies to 0.8 p.c. for British Columbia.

Some of the major factors underlying the larger changes from January 1970 are presented in the footnotes to Table B.

Industrial composite .....		0.2	- 0.4	0.1	0.7	- 0.2	- 0.8

- (1) Relatively few employees in this region.
- (2) Seasonal lay-offs mainly in logging.
- (3) Settlement of industrial dispute in a component industry.
- (4) Mainly in saw, shingle and planing mills.
- (5) Return to work following lay-offs in motor vehicle assembling.
- (6) Mainly in ship-building and repairing.
- (7) Lay-offs in fish products.
- (8) Increased activity.
- (9) Reduced activity in both components.
- (10) Mainly in special trade contractors.
- (11) Mainly in general contractors.
- (12) Mainly in highways, bridges and streets; seasonal.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

Average Weekly Wages and Salaries - Average weekly wages and salaries at the composite level rose \$1.36 from \$123.08 in January 1970 to \$124.44 in February and increased \$9.14 over the year. All industries showed higher average weekly wages and salaries in February 1970 except finance, insurance and real estate where a decrease of \$1.25 was recorded. Forestry increased \$11.36. Increases in the remaining industries ranged from \$0.99 for trade to \$2.00 for transportation, communication and other utilities.

Some of the major factors underlying the larger changes from January 1970 are presented in the footnotes to Table C.

TABLE C. Changes from last month in Selected Series of Average Weekly Wages and Salaries, February 1970

Industry	Canada	Atlantic Region	Quebec	Ontario	Prairie Region	British Columbia
	dollars

Industrial composite .....	1.36	1.26	0.63	1.86	1.38	0.91

(1) Relatively few employees in this region.

(2) Mainly increased overtime payments this month; also some decrease in the proportion of lower paid employees.

(3) Increased employment in a component where average weekly wages and salaries are higher than the industry average.

(4) Fewer hours worked this month.

(5) More hours worked this month.

(6) Return to work of employees following lay-offs in a component where wages are above the industry average.

(7) Increased employment in a component where the average weekly wages and salaries are lower than the industry average.

(8) Mainly in fish products.

(9) Mainly in general contractors.

(10) Increased employment in highways, bridges and streets where average weekly wages and salaries are lower than the industry average.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments. The latest figures throughout this publication are subject to revision.

TABLE 7. Employment Distribution by Sex, by Selected Industries, for Canada

S.I.C. Code	Industry	February 1970		January 1970		February 1969		February 1968	
		Men	Women	Men	Women	Men	Women	Men	Women
		per cent							
031-039	FORESTRY .....	97.8	2.2	97.9	2.1	97.8	2.2	98.0	2.0
031	Logging .....	97.6	2.4	97.8	2.2	97.6	2.4	97.9	2.1
039	Forestry services .....	99.7	0.3	99.7	0.3	99.1	0.9	98.7	1.3
050-099	MINING, INCLUDING MILLING .....	94.9	5.1	95.0	5.0	95.4	4.6	95.5	4.5
050-059	Metals .....	96.9	3.1	96.9	3.1	97.0	3.0	97.1	2.9
061-063	Mineral fuels .....	87.4	12.6	88.8	11.2	89.8	10.2	89.7	10.3
071-079	Non-metals except fuels .....	96.0	4.0	96.2	3.8	95.4	4.6	96.2	3.8
083-087	Quarries and sand pits .....	95.8	4.2	93.2	6.8	96.1	3.9	95.7	4.3
092-099	Services incidental to mining ....	95.4	4.6	95.4	4.6	96.2	3.8	95.8	4.2
100-399	MANUFACTURING .....	76.3	23.7	76.6	23.4	76.6	23.4	76.3	23.7
	Durable goods .....	86.0	14.0	86.0	14.0	86.3	13.7	86.1	13.9
	Non-durable goods .....	66.8	33.2	67.3	32.7	67.3	32.7	67.2	32.8
100-147	Food and beverages .....	75.4	24.6	75.9	24.1	75.9	24.1	75.7	24.3
150-153	Tobacco processing and products ..	59.1	40.9	59.3	40.7	57.3	42.7	55.6	44.4
161-169	Rubber products .....	80.6	19.4	80.5	19.5	79.5	20.5	78.9	21.1
170-179	Leather products .....	48.3	51.7	49.0	51.0	49.6	50.4	50.5	49.5
180-229	Textile products .....	65.0	35.0	66.2	33.8	65.6	34.4	66.3	33.7
230-239	Knitting mills .....	35.3	64.7	35.0	65.0	34.6	65.4	33.3	66.7
240-249	Clothing .....	24.3	75.7	24.7	75.3	26.0	74.0	25.1	74.9
250-259	Wood products .....	93.5	6.5	93.6	6.4	93.5	6.5	93.2	6.8
260-269	Furniture and fixtures .....	80.6	19.4	81.6	18.4	82.0	18.0	82.4	17.6
270-274	Paper and allied industries .....	87.3	12.7	87.3	12.7	87.0	13.0	87.0	13.0
280-289	Printing, publishing and allied industries .....	70.1	29.9	70.1	29.9	71.1	28.9	70.9	29.1
290-298	Primary metal industries .....	94.3	5.7	94.8	5.2	95.0	5.0	94.9	5.1
300-309	Metal fabricating industries .....	86.5	13.5	86.4	13.6	86.7	13.3	86.8	13.2
310-318	Machinery, except electrical .....	87.6	12.4	87.9	12.1	88.2	11.8	88.2	11.8
320-329	Transportation equipment .....	91.4	9.6	89.7	10.3	90.0	10.0	89.0	11.0
330-339	Electrical products .....	68.8	31.2	68.9	31.1	68.6	31.4	69.9	30.1
340-359	Non-metallic mineral products ....	87.5	12.5	87.2	12.8	88.7	11.3	87.6	12.4
360-369	Petroleum and coal products .....	84.2	15.8	83.9	16.1	84.6	15.4	84.6	15.4
370-379	Chemicals and chemical products ..	76.7	23.3	77.2	22.8	67.1	22.9	77.2	22.8
380-399	Miscellaneous manufacturing industries .....	62.6	37.4	63.2	36.8	62.6	37.4	63.4	36.6
400-421	CONSTRUCTION .....	95.8	4.2	95.7	4.3	96.0	4.0	96.1	3.9
404,421	Building .....	95.8	4.2	95.7	4.3	96.0	4.0	96.0	4.0
406-409	Engineering .....	95.8	4.2	95.6	4.4	96.2	3.8	96.4	3.6
500-579	TRANSPORTATION, COMMUNICATION AND OTHER UTILITIES .....	84.9	15.1	84.9	15.1	85.9	14.1	85.6	14.4
500-519	Transportation .....	93.3	6.7	93.3	6.7	93.8	6.2	93.7	6.3
524-527	Storage .....	88.8	11.2	88.5	11.5	89.4	10.6	89.6	10.4
543-548	Communication .....	62.8	37.2	62.6	37.4	64.5	35.5	64.4	35.6
572-579	Electric power, gas and water ....	86.8	13.2	87.1	12.9	87.4	12.6	86.6	13.4
600-699	TRADE .....	62.4	37.6	62.5	37.5	63.7	36.3	63.3	36.7
600-629	Wholesale trade .....	77.5	22.5	77.5	22.5	78.3	21.7	77.8	22.2
630-699	Retail trade .....	54.6	45.4	54.8	45.2	56.2	43.8	55.7	44.3
700-737	FINANCE, INSURANCE AND REAL ESTATE	47.1	52.9	47.3	52.7	47.9	52.1	48.1	51.9
702-704	Financial institutions .....	42.0	58.0	42.1	57.9	42.7	57.3	42.6	57.4
731-737	Insurance and real estate .....	54.6	45.4	55.0	45.0	55.5	44.5	55.9	44.1
850-899	SERVICE .....	58.8	41.2	58.4	41.6	59.7	40.3	59.2	40.8
851-859	Recreational services .....	69.2	30.8	68.9	31.1	69.8	30.2	65.4	34.6
861-869	Business services .....	65.0	35.0	65.2	34.8	66.2	33.8	68.4	31.6
871-879	Personal services .....	48.7	51.3	47.8	52.2	49.2	50.8	49.0	51.0
891-899	Miscellaneous services .....	70.8	29.2	70.8	29.2	72.8	27.2	72.4	27.6
031-899	INDUSTRIAL COMPOSITE .....	73.5	26.5	73.6	26.4	74.4	25.6	74.3	25.7

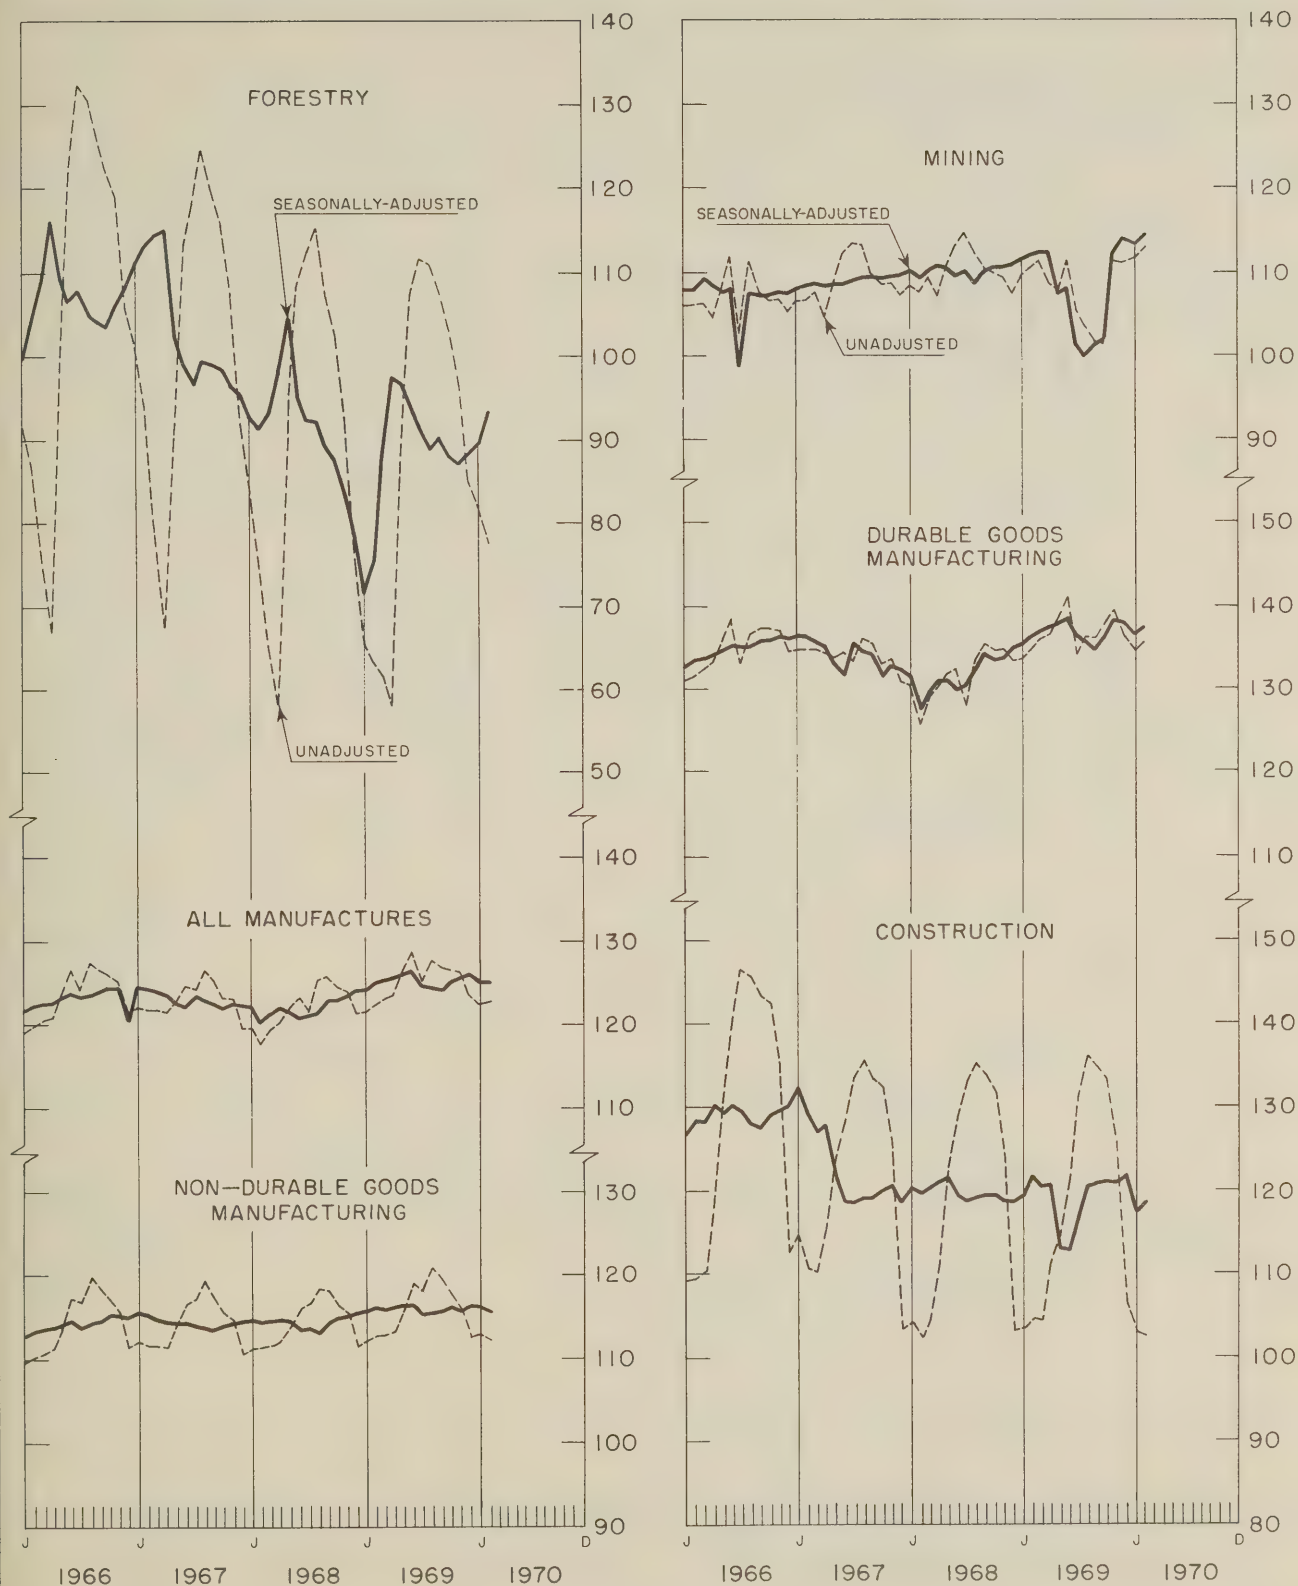

TABLE 8. Index Numbers of Employment, Payrolls and Average Weekly Wages and Salaries (1961=100), with Average Weekly Wages and Salaries in Dollars, Industrial Composite and Manufacturing, for Canada(1)

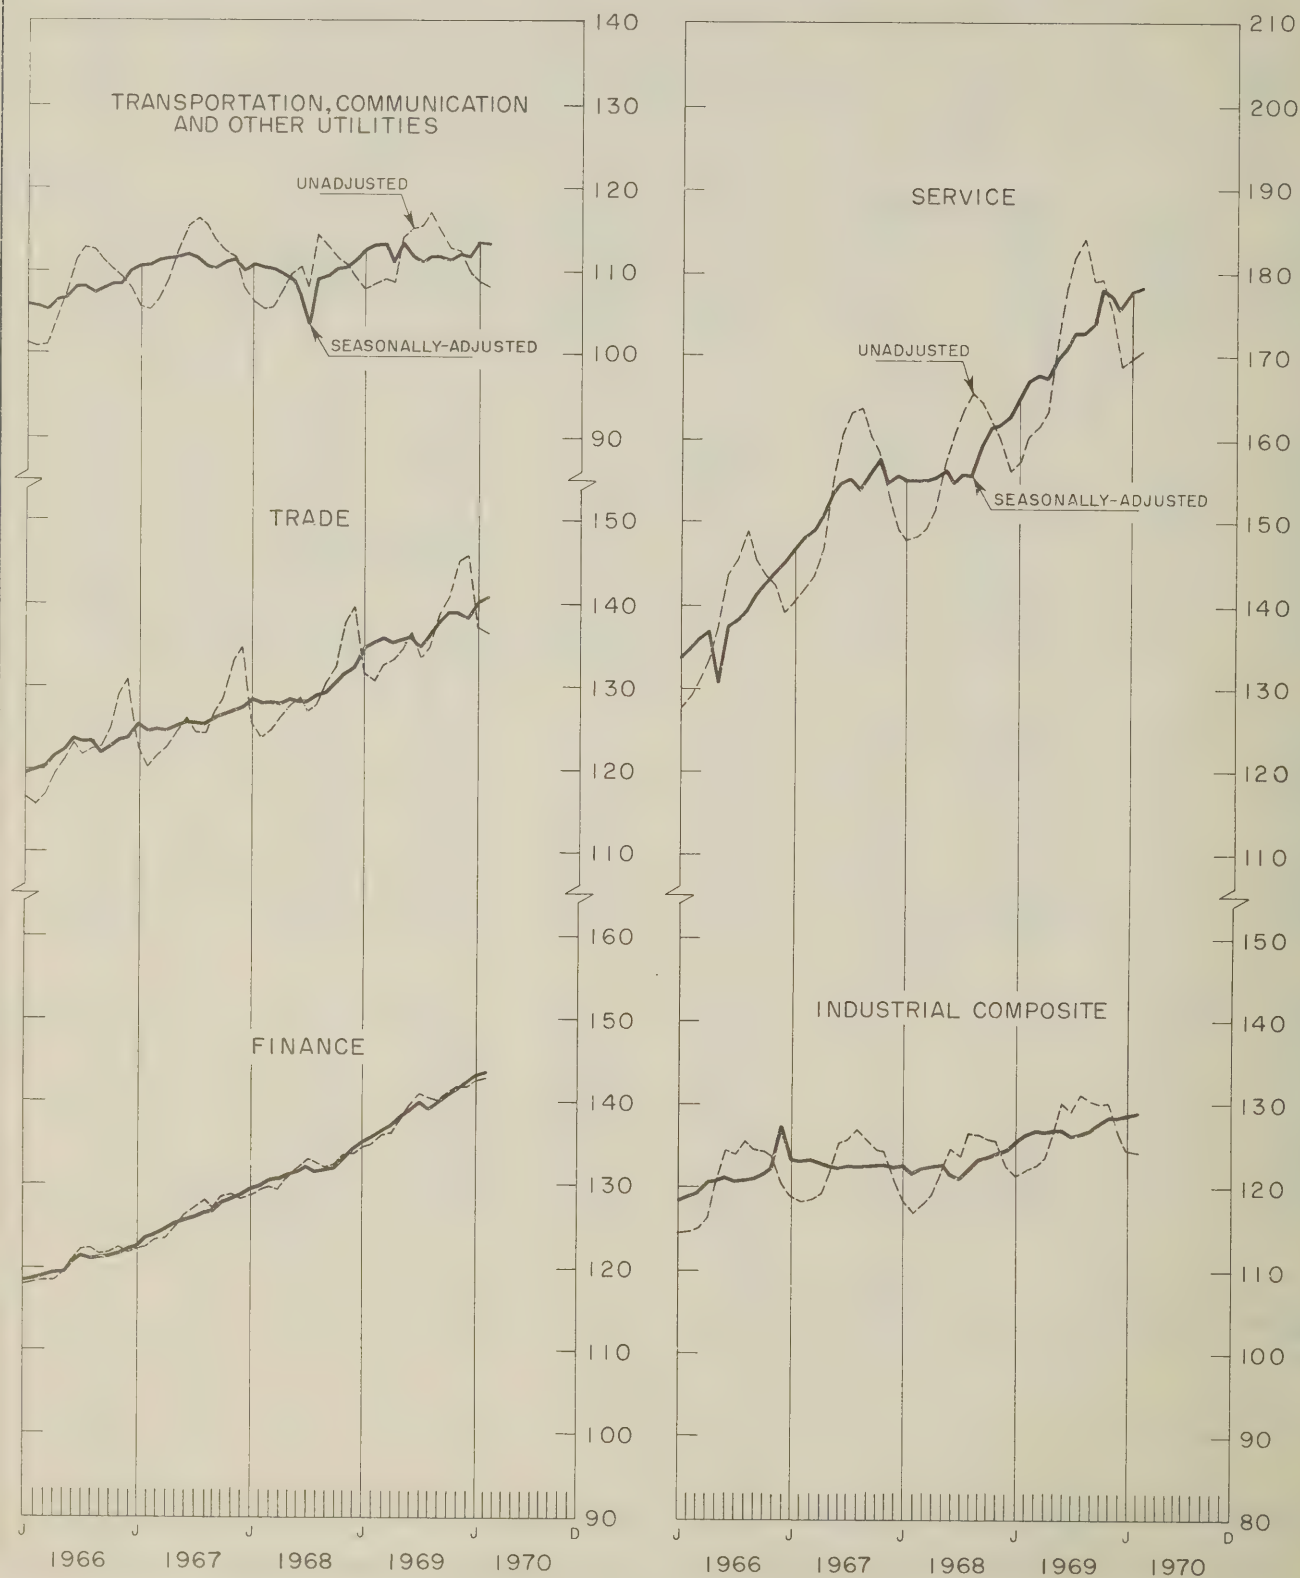

Year and month	Industrial composite				Manufacturing			
	Index numbers			Average weekly wages and salaries	Index numbers			Average weekly wages and salaries
	Employment	Aggregate weekly payrolls	Average weekly wages and salaries		Employment	Aggregate weekly payrolls	Average weekly wages and salaries	
		1961=100		dollars		1961=100		dollars
Average - 1961 ....	100.0	100.0	100.0	78.24	100.0	100.0	100.0	81.55

TABLE 12. Average Weekly Wages and Salaries (in dollars), Urban Areas - Concluded

## Industrial Composite

[illegible]

## NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

### The Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually, employing 15 or more" criteria that was formerly used.

### Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

### Definitions

#### Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

### Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

### Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

### Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

### Employment

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

### Average Weekly Wages and Salaries

The wages and salaries are derived from payrolls which include gross payments before deduction are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

### Organization of Data

#### The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

### Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

July 1970  
8003-501

Price: 40 cents  
\$4.00 a year

Vol. 48—No. 4

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year  
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year  
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$4.00 per year  
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year  
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$2.00 per year  
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50  
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50  
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents  
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents  
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-508 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents  
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).
- 72-510 - Labour Costs in Manufacturing 1968 - Price \$1.50 (Estimates of selected employer labour Costs, by industry group and area - Report prepared jointly by Labour Division of D.B.S and Economics and Research Branch of the Canada Department of Labour)

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

Methodology and scope of Monthly Surveys of Employment and Average Weekly Wages and Salaries ..	i
---	---

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

APRIL 1970

Advance estimates indicate a slight upward change in the unadjusted composite index of employment (1961=100) from March to April 1970. Compared to April 1969, the estimates show an increase

Seasonally-adjusted, the composite index of employment showed a small drop over the month. All industry divisions shown recorded declines except mining which increased. All regions reported decreases except the Atlantic and Prairie regions where increases occurred.

Average weekly wages and salaries at the composite level were higher in April than March 1970. Increases were recorded in all industry divisions except mining where a decrease occurred. All regions recorded increases in average weekly wages and salaries.

Additional industry and area detail other than that presented in Table A for April 1970 is not yet available.

<sup>p</sup> Preliminary figures.

March 1970

**Employment** - The unadjusted index of employment for the industrial composite at 124.3 was unchanged from February 1970 but was 1.4 p.c. higher than in March 1969. All regions recorded decreases over the month except British Columbia and the Atlantic region where increases occurred. All regions reported increases over the year except the Atlantic region which showed a decrease.

Seasonally-adjusted, the composite index of employment decreased 0.2 p.c. from 129.0 in February to 128.7 in March 1970. Decreases were recorded in all industries except forestry and services which increased and transportation, communication and other utilities which showed no change. Decreases ranged from 0.1 p.c. for finance, insurance and real estate to 1.9 p.c. for construction. Decreases were recorded for British Columbia (1.0 p.c.), the Prairie region (0.5 p.c.) and Ontario (0.2 p.c.). The remaining regions showed increases.

Some of the major factors influencing the larger changes from February 1970 are presented in the footnotes to Table B.

TABLE B. Percentage Changes in Seasonally-adjusted and Unadjusted Employment Index Numbers for Canada and Regions, February to March 1970

Industrial composite .....		- 0.2	0.6	0.5	- 0.2	- 0.5	- 1.0

- (1) Relatively few employees in this region.
- (2) Industrial dispute.
- (3) Mainly in iron and steel mills.
- (4) Increased activity.
- (5) Lay-offs mainly in wire and wire products.
- (6) Mainly in shipbuilding and repair.
- (7) Mainly in fish products.
- (8) Mainly in special trade contractors.
- (9) In both components.
- (10) Mainly in other engineering.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

Average Weekly Wages and Salaries - Average weekly wages and salaries at the composite level decreased \$0.41 from \$124.14 in February to \$123.73 in March 1970 and increased \$7.30 over the year. All industry divisions showed lower average weekly wages and salaries in March over February 1970 except mining, finance, insurance and real estate, trade and transportation, communications and other utilities. Decreases ranged from \$0.09 for manufacturing to \$9.25 for construction. All regions recorded decreases except British Columbia which showed a gain of \$0.45.

Some of the major factors influencing the larger changes from February 1970 are presented in the footnotes to Table C.

Service .....	- 0.61	- 0.75	0.22	- 0.54	- 1.73	- 0.82
Industrial composite .....	- 0.41	- 0.09	- 0.40	- 0.59	- 0.59	0.45

- (1) Relatively few employees in this region.
- (2) Short-time, reduced employment in an industry where average weekly wages and salaries are above the industry average.
- (3) Increase in the proportion of higher-paid employees.
- (4) Industrial dispute in a component where average weekly wages and salaries are lower than the industry average.
- (5) Increased bonus payments; also premium pay for holiday work.
- (6) Fewer hours worked.
- (7) Reduced employment in components where the average weekly wages and salaries are lower than the industry average.
- (8) Wage increases; some overtime.
- (9) Mainly in slaughtering and meat processing.
- (10) In several components.
- (11) Mainly in special trade contractors, fewer hours worked.
- (12) Mainly in other engineering, fewer hours worked.
- (13) Reduced employment of lower-paid employees mainly in department stores and food stores; also some overtime payments.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 12. Average Weekly Wages and Salaries (in dollars), Urban Areas - Concluded

## Industrial Composite

[illegible]

## NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

### The Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually, employing 15 or more" criteria that was formerly used.

### Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

### Definitions

#### Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

### Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

### Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

### Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

### Employment

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

### Average Weekly Wages and Salaries

The wages and salaries are derived from payrolls which include gross payments before deduction are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

### Organization of Data

#### The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

#### Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year  
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year  
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$4.00 per year  
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year  
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$2.00 per year  
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50  
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50  
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents  
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents  
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-508 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents  
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).
- 72-510 - Labour Costs in Manufacturing 1968 - Price \$1.50 (Estimates of selected employer labour Costs, by industry group and area - Report prepared jointly by Labour Division of D.B.S and Economics and Research Branch of the Canada Department of Labour)

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

MAY 1970

The advance estimate of the unadjusted composite index of employment indicates an increase in May over April 1970. All industries shown experienced gains except manufacturing which recorded a slight decline.

Seasonally-adjusted, the composite index of employment indicates a drop in May over the level in April 1970. With the exception of finance, insurance and real estate, all industry divisions for which data are given in Table A, declined.

Average weekly wages and salaries at the composite level were higher in May compared to April 1970. Increases were recorded in manufacturing, construction, trade and service, and decreases in the remaining industries shown.

For May 1970, additional industry and area details other than those presented in Table A are not yet available.

APRIL 1970

**Employment** - The unadjusted index of employment for the industrial composite at 124.5 (1961=100) was 0.2 per cent higher in April than in March 1970 and 0.9 per cent higher than in April 1969. Increases were recorded in construction, transportation, communication and other utilities, service and trade and decreases in the remaining industries. The regional change in employment varied from a decline of 0.6 per cent in the Prairies to an increase of 1.8 per cent in the Atlantic region.

Seasonally-adjusted, the composite index of employment at 127.9 dropped 0.5 per cent in April from 128.6 in March 1970. The industry divisions that registered increases were mining (1.9 per cent), finance, insurance and real estate (0.1 per cent) and service (0.1 per cent). The remaining industry divisions recorded decreases ranging from 0.4 per cent in manufacturing to 2.0 per cent in construction. The employment index for Atlantic region climbed by 2.4 per cent in April from its level a month ago. For the other regions it was a negative change from March to April.

Some of the major factors underlying the larger changes from March 1970 are presented in the footnotes to Table B.

TABLE B. Percentage Changes in Seasonally-adjusted and Unadjusted Employment Index Numbers for Canada and Regions, April 1970

Industry	Seasonally-adjusted	Unadjusted					
	Canada	Canada	Atlantic Region	Quebec	Ontario	Prairie Region	British Columbia
Forestry .....	- 1.1	- 15.5	- 25.1(2)	- 28.9(2)	- 17.1	- 10.6	- 4.2

Industrial composite .....	- 0.5	0.2	1.8	0.1	0.4	- 0.6	- 0.1
Seasonally-adjusted							
Industrial composite .....		- 0.5	2.4	- 1.4	- 0.5	- 0.5	- 0.7

- (1) Relatively few employees in this region.
- (2) Greater than seasonal layoffs - mainly in logging.
- (3) Return to work following settlement of industrial dispute.
- (4) Mainly in petroleum contract drilling; seasonal.
- (5) Mainly in saw, shingle and planing mills.
- (6) Increased activity.
- (7) Mainly in shipbuilding and repair.
- (8) Seasonal increase in fish products.
- (9) Layoffs mainly in synthetic textile mills.
- (10) Industrial dispute mainly affecting general contracting.
- (11) Mainly in highways, bridges and streets; seasonal increase.

**Note:** Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month.

Average Weekly Wages and Salaries - Average weekly wages and salaries at the composite level rose \$1.67 from \$123.79 in March to \$125.46 in April 1970. Over the year, the average weekly wages and salaries increased by \$9.03 from the April 1969 level of \$116.43. Among the industry divisions, change in April over the preceding month was increases in construction (\$10.48); forestry (\$3.96); finance, insurance and real estate (\$1.55); manufacturing (\$1.37), transportation, communication and other utilities (\$1.25) and service (\$1.01) and a decrease in mining (\$2.72). All regions shared in the increases in average weekly wages in salaries over the previous month.

Some of the major factors underlying the larger changes from March 1970 are presented in the footnotes to Table C.

TABLE C. Changes in Average Weekly Wages and Salaries for Canada and Regions, April 1970

Industry	Canada	Atlantic Region	Quebec	Ontario	Prairie Region	British Columbia

(1) Relatively few employees in this region

(2) Decrease of lower paid employees in logging where wages are above the forestry average.

(3) Overtime and bonus payments last month associated with Easter holiday.

(4) More hours worked this month.

(5) Wage increase.

(6) Fewer overtime payments this month.

(7) Wage increase; also reduction of lower paid employees in several components.

(8) Increased employment mainly in general contracting where wages are above the building average.

(9) Increased employment mainly in other engineering where wages are above the engineering average; also short-time last month.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month.

## NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

### The Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

### Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

### Definitions

#### Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

### Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

### Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

### Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

### Employment

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

### Average Weekly Wages and Salaries

The wages and salaries are derived from payrolls which include gross payments before deduction are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

### Organization of Data

#### The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

#### Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

### EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

JUNE 1970

The advance estimate of unadjusted composite index of employment (1961=100) indicates an increase in June over May 1970. Compared to June 1969 index the estimate represents a small drop in employment.

Seasonally-adjusted, the June composite index of employment shows a small increase over the preceding month. Among the industry divisions for which data are given in Table A, manufacturing, construction, and finance, insurance and real estate recorded increases. Regionally, Quebec and British Columbia reported increases and the remaining regions, decreases.

Average weekly wages and salaries at the composite level were higher in June than in May 1970. Increases were recorded in all industry divisions except mining and construction which declined. All regions reported increases except Quebec, where a decrease was recorded.

MAY 1970

#### Employment

The unadjusted index of employment for the industrial composite at 126.5 (1961=100) was 1.6 per cent higher in May than in April 1970 and 0.4 per cent lower than the May 1969 level of 127.0. Over the month, all industry divisions recorded increases ranging from 0.5 per cent in finance, insurance and real estate to 21.8 per cent in forestry. Among the regions, only British Columbia reported a drop (2.1 per cent) whereas the remaining regions recorded advances in employment, the largest being 5.1 per cent in the Atlantic region.

Seasonally-adjusted, the industrial composite index of employment at 126.3 was 1.2 per cent below April 1970 level. All industry divisions recorded decreases. All regions showed declines, smallest being 0.2 per cent in Ontario and the largest 4.2 per cent in British Columbia.

#### Average Weekly Wages and Salaries

Average weekly wages and salaries at the composite level rose from \$125.53 in April to \$126.12 in May 1970. Compared to May 1969, the average weekly wages and salaries increased by \$8.86. Among the industry divisions, changes in May over the preceding month were increases in manufacturing; construction; transportation, communication and other utilities and trade and decreases in forestry; mining; service and finance, insurance and real estate. Regionally, average weekly wages and salaries rose in Ontario, the Prairie Region and Quebec. There were declines in the Atlantic Region and in British Columbia.

### L'EMPLOI ET LA RÉMUNÉRATION HEBDOMADAIRE MOYENNE

JUIN 1970

Selon les estimations provisoires, l'indice synthétique de l'emploi (1961=100) a monté en juin par rapport à mai 1970. Par comparaison à l'indice de juin 1969, les estimations représentent une légère baisse de l'emploi.

Corrigé des variations saisonnières, l'indice synthétique de l'emploi indique en juin une légère augmentation sur le mois précédent. Parmi les branches d'activité dont les données figurent au tableau A, l'industrie manufacturière, la construction et les finances, les assurances et l'immeuble ont enregistré des augmentations. Sur le plan régional, le Québec et la Colombie-Britannique ont enregistré des augmentations et les autres régions, des diminutions.

Dans l'ensemble, la rémunération hebdomadaire moyenne était plus élevée en juin qu'en mai. On a signalé des augmentations dans toutes les branches d'activité, sauf dans l'extraction minière et la construction, où il y a eu baisse. Toutes les régions ont connu des augmentations, sauf le Québec, où l'on a enregistré une diminution.

MAI 1970

#### Emploi

À 126.5 (1961=100) l'indice non corrigé dans l'ensemble des branches d'activité en mai était de 1.6 p. 100 plus élevé qu'en avril, et de 0.4 p. 100 moins élevé qu'en mai 1969 (127.0). Au cours du mois, toutes les branches d'activité ont enregistré des augmentations se situant entre 0.5 p. 100 (finances, assurance et immeuble) et 21.8 p. 100 (industrie forestière). Sur le plan régional, seule la Colombie-Britannique a connu une baisse (2.1 p. 100), tandis que les autres régions ont enregistré des progressions, la plus notable étant de 5.1 p. 100 dans la région Atlantique.

Corrigé des variations saisonnières, l'indice synthétique de l'emploi (126.3) est de 1.2 p. 100 inférieur à celui d'avril 1970. Toutes les branches d'activité ont subi des baisses. Toutes les régions ont enregistré des baisses, la plus petite étant de 0.2 p. 100 en Ontario et la plus considérable de 4.2 p. 100 en Colombie-Britannique.

#### Rémunération hebdomadaire moyenne

La rémunération hebdomadaire moyenne dans l'ensemble des branches d'activité est passée de \$125.53 en avril à \$126.12 en mai 1970. Par rapport à mai 1969, la rémunération hebdomadaire moyenne a monté de \$8.86. Au niveau des branches d'activité, les changements par rapport au mois précédent sont des accroissements dans l'industrie manufacturière, dans la construction, dans les transports, les communications et les autres services d'utilité publique, et dans le commerce, et des baisses dans l'industrie forestière, dans l'extraction minière, dans les services et dans les finances, les assurances et l'immeuble. La rémunération hebdomadaire a augmenté en Ontario, dans la région des Prairies et au Québec. On a enregistré une diminution dans la région Atlantique et en Colombie-Britannique.

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year  
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year  
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$4.00 per year  
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year  
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$2.00 per year  
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50  
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50  
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents  
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents  
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-508 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents  
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).
- 72-510 - Labour Costs in Manufacturing 1968 - Price \$1.50 (Estimates of selected employer labour Costs, by industry group and area - Report prepared jointly by Labour Division of D.B.S and Economics and Research Branch of the Canada Department of Labour)

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

JULY 1970

The July 1970 advance estimate of the unadjusted composite index of employment indicates a decline from June as well as from July 1969. Among the industry divisions for which July data are given in Table A, the largest relative changes were increases in mining and construction and decreases in manufacturing and trade. With the exception of Quebec and Ontario which showed declines, all regions showed higher levels of employment.

Seasonally-adjusted, the composite index of employment decreased from June to July 1970. With the exception of mining which showed an increase, all industry divisions recorded declines. All regions showed decreases except Ontario, which remained unchanged.

Average weekly wages and salaries at the composite level were lower in July compared to June 1970. The industry divisions showing increased average weekly wages and salaries were construction, trade, and service; those showing decreases were mining, manufacturing, and finance, insurance and real estate. With the exception of the Prairie Region, where a slight rise occurred, all regions recorded declines.

For July 1970, additional industry and area details other than those presented in Table A are not yet available.

<sup>a</sup> Advance figures.

<sup>p</sup> Preliminary figures.

June 1970

Employment - The unadjusted composite index of employment (1961 = 100) increased by 2.3 p.c. from 126.7 in May to 129.6 in June and was 0.5 p.c. lower than the June 1969 level of 130.2. Over the month, all industry divisions contributed to the rise with the largest increase in forestry (29.5 p.c.). All regions recorded gains ranging from 1.4 p.c. in Ontario to 4.4 p.c. in the Atlantic Region.

Seasonally-adjusted, the composite index showed little change from 126.7 in May to 126.4 in June. Among the industry divisions, the largest change was a 1.8 p.c. increase in forestry. Small decreases were recorded in mining, transportation, communication and other utilities, in trade, and in service. Slight increases occurred in the remaining industries. With the exception of Quebec, which showed a slight gain, all regions recorded declines.

Some of the major factors underlying the larger changes from May 1970 are presented in the footnotes to Table B.

TABLE B. Percentage Changes in Seasonally-adjusted and Unadjusted Employment Index Numbers for Canada and Regions, June 1970

(1) Relatively few employees in this region.

(2) Mainly in logging.

(3) Mainly in metal mining.

(4) Mainly in saw, shingle and planing mills.

(5) Termination of industrial dispute.

(6) Increased activity in several components.

(7) Layoffs associated with model changeover in motor vehicle manufacturing.

(8) Mainly in fish products; seasonal.

(9) Mainly in general contracting.

(10) Mainly in special trade contracting.

(11) Mainly in highways, bridges and streets.

(12) Seasonal increase in highway and bridge maintenance.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

Average Weekly Wages and Salaries - Average weekly wages and salaries at the composite level rose to \$127.17 in June from \$126.07 recorded in May 1970. From June 1969, the increase over-the-year was \$9.56 (8.1 per cent). Most industry divisions showed higher levels in May 1970.

Small declines occurred in forestry and mining. All regions experienced increases from the May 1970 level of average weekly wages and salaries which ranged from 0.5 per cent in Quebec to 1.2 per cent in British Columbia.

Some of the major factors underlying the larger changes from May 1970 are presented in the footnotes to Table C.

(1) Relatively few employees in this region.

(2) Mainly in logging.

(3) Decrease of higher-paid employees.

(4) Return to work of lower-paid employees following settlement of industrial dispute.

(5) Mainly in saw, shingle and planing mills.

(6) Overtime payments last month.

(7) Overtime payments.

(8) Wage increases and decrease of lower-paid employees in motor vehicle manufacturing where wages are above the transportation equipment average.

(9) Increased employment in a component where wages are above the industry average.

(10) Return to work of lower-paid employees following settlement of industrial dispute in pulp and paper mills where wages are above the industry average.

(11) Mainly in general contracting; overtime payments last month; some short-time this month.

(12) Decrease of lower-paid employees mainly in general contracting where wages are above the building average.

(13) Overtime payments last month; also short-time this month due to industrial dispute affecting part of reference period.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 7. Employment Distribution by Sex, by Selected Industries, for Canada

S. I. C. Code	Industry	June 1970		May 1970		June 1969		June 1968	
		Men	Women	Men	Women	Men	Women	Men	Women
		per cent							
031-039	FORESTRY .....	98.3	1.7	97.9	2.1	98.5	1.5	98.5	1.5
031	Logging .....	98.1	1.9	97.6	2.4	98.3	1.7	98.4	1.6
039	Forestry services .....	99.6	0.4	99.4	0.6	99.8	0.2	99.4	0.6
050-099	MINING, INCLUDING MILLING .....	94.9	5.1	95.0	5.0	95.3	4.7	95.4	4.6
050-059	Metals .....	96.9	3.1	96.9	3.1	97.0	3.0	97.0	3.0
061-063	Mineral fuels .....	88.4	11.6	88.6	11.4	89.2	10.8	89.9	10.1
071-079	Non-metals except fuels .....	96.0	4.0	96.1	3.9	96.0	4.0	96.2	3.8
083-087	Quarries and sand pits .....	96.3	3.7	95.8	4.2	96.6	3.4	96.5	3.5
092-099	Services incidental to mining ....	94.5	5.5	94.6	5.4	95.6	4.4	96.2	3.8
100-399	MANUFACTURING .....	76.7	23.3	76.5	23.5	76.8	23.2	76.7	23.3
	Durable goods .....	86.4	13.6	86.2	13.8	86.4	13.6	86.7	13.3
	Non-durable goods .....	67.8	32.2	67.3	32.7	67.6	32.4	67.4	32.6
100-147	Food and beverages .....	74.7	25.3	75.1	24.9	74.8	25.2	74.8	25.2
150-153	Tobacco processing and products ..	59.8	40.2	58.6	41.4	56.6	43.4	54.8	45.2
161-169	Rubber products .....	81.4	18.6	81.8	18.2	79.8	20.2	77.0	23.0
170-179	Leather products .....	49.3	50.7	49.6	50.4	49.6	50.4	50.6	49.4
180-229	Textile products .....	65.8	34.2	64.5	35.5	66.1	33.9	66.2	33.8
230-239	Knitting mills .....	34.3	65.7	34.3	65.7	35.4	64.6	34.5	65.5
240-249	Clothing .....	25.2	74.8	24.4	75.6	25.6	74.4	25.2	74.8
250-259	Wood products .....	93.9	6.1	93.3	6.7	93.9	6.1	93.5	6.5
260-269	Furniture and fixtures .....	82.4	17.6	81.8	18.2	82.1	17.9	82.5	17.5
270-274	Paper and allied industries .....	87.6	12.4	87.1	12.9	87.2	12.8	87.5	12.5
280-289	Printing, publishing and allied industries .....	70.5	29.5	70.2	29.8	70.9	29.1	71.1	28.9
290-298	Primary metal industries .....	94.6	5.4	94.9	5.1	95.0	5.0	94.9	5.1
300-309	Metal fabricating industries .....	86.5	13.5	86.6	13.4	87.0	13.0	87.0	13.0
310-318	Machinery, except electrical .....	87.7	12.3	87.1	12.9	88.3	11.7	87.4	12.6
320-329	Transportation equipment .....	89.6	10.4	89.8	10.2	89.9	10.1	90.6	9.4
330-339	Electrical products .....	69.6	30.4	69.4	30.6	68.4	31.6	69.8	30.2
340-359	Non-metallic mineral products ....	88.2	11.8	87.9	12.1	88.9	11.1	88.8	11.2
360-369	Petroleum and coal products .....	84.1	15.9	84.2	15.8	84.3	15.7	85.0	15.0
370-379	Chemicals and chemical products ..	77.3	22.7	77.2	22.8	77.3	22.7	77.3	22.7
380-399	Miscellaneous manufacturing industries .....	63.8	36.2	62.9	37.1	62.5	37.5	62.7	37.3
400-421	CONSTRUCTION .....	96.4	3.6	96.2	3.8	96.5	3.5	96.8	3.2
404,421	Building .....	96.0	4.0	95.8	4.2	96.2	3.8	96.4	3.6
406-409	Engineering .....	97.1	2.9	97.2	2.8	97.1	2.9	97.4	2.6
500-579	TRANSPORTATION, COMMUNICATION AND OTHER UTILITIES .....	84.6	15.4	84.9	15.1	85.8	14.2	86.1	13.9
500-519	Transportation .....	93.1	6.9	93.1	6.9	93.7	6.3	93.9	6.1
524-527	Storage .....	89.0	11.0	87.7	12.3	90.0	10.0	89.6	10.4
543-548	Communication .....	61.1	38.9	62.7	37.3	62.8	37.2	64.7	35.3
572-579	Electric power, gas and water ....	87.4	12.6	87.5	12.5	87.6	12.4	86.8	13.2
600-699	TRADE .....	62.4	37.6	62.4	37.6	63.2	36.8	63.0	37.0
600-629	Wholesale trade .....	77.3	22.7	77.5	22.5	78.2	21.8	78.1	21.9
630-699	Retail trade .....	54.7	45.3	54.6	45.4	55.5	44.5	55.1	44.9
700-737	FINANCE, INSURANCE AND REAL ESTATE	42.9	57.1	47.3	52.7	47.9	52.1	48.5	51.5
702-704	Financial institutions .....	34.8	65.2	41.9	58.1	42.7	57.3	43.3	56.7
731-737	Insurance and real estate .....	54.7	45.3	55.1	44.9	55.4	44.6	55.7	44.3
850-899	SERVICE .....	59.1	40.9	59.1	40.9	60.5	39.5	59.6	40.4
851-859	Recreational services .....	70.5	29.5	71.5	28.5	72.0	28.0	67.8	32.2
861-869	Business services .....	66.6	33.4	65.9	34.1	67.7	32.3	68.8	31.2
871-879	Personal services .....	47.7	52.3	47.5	52.5	48.8	51.2	48.6	51.4
891-899	Miscellaneous services .....	71.5	28.5	72.3	27.7	74.6	25.4	74.0	26.0
031-899	INDUSTRIAL COMPOSITE .....	73.7	26.3	73.7	26.3	74.7	25.3	75.0	25.0

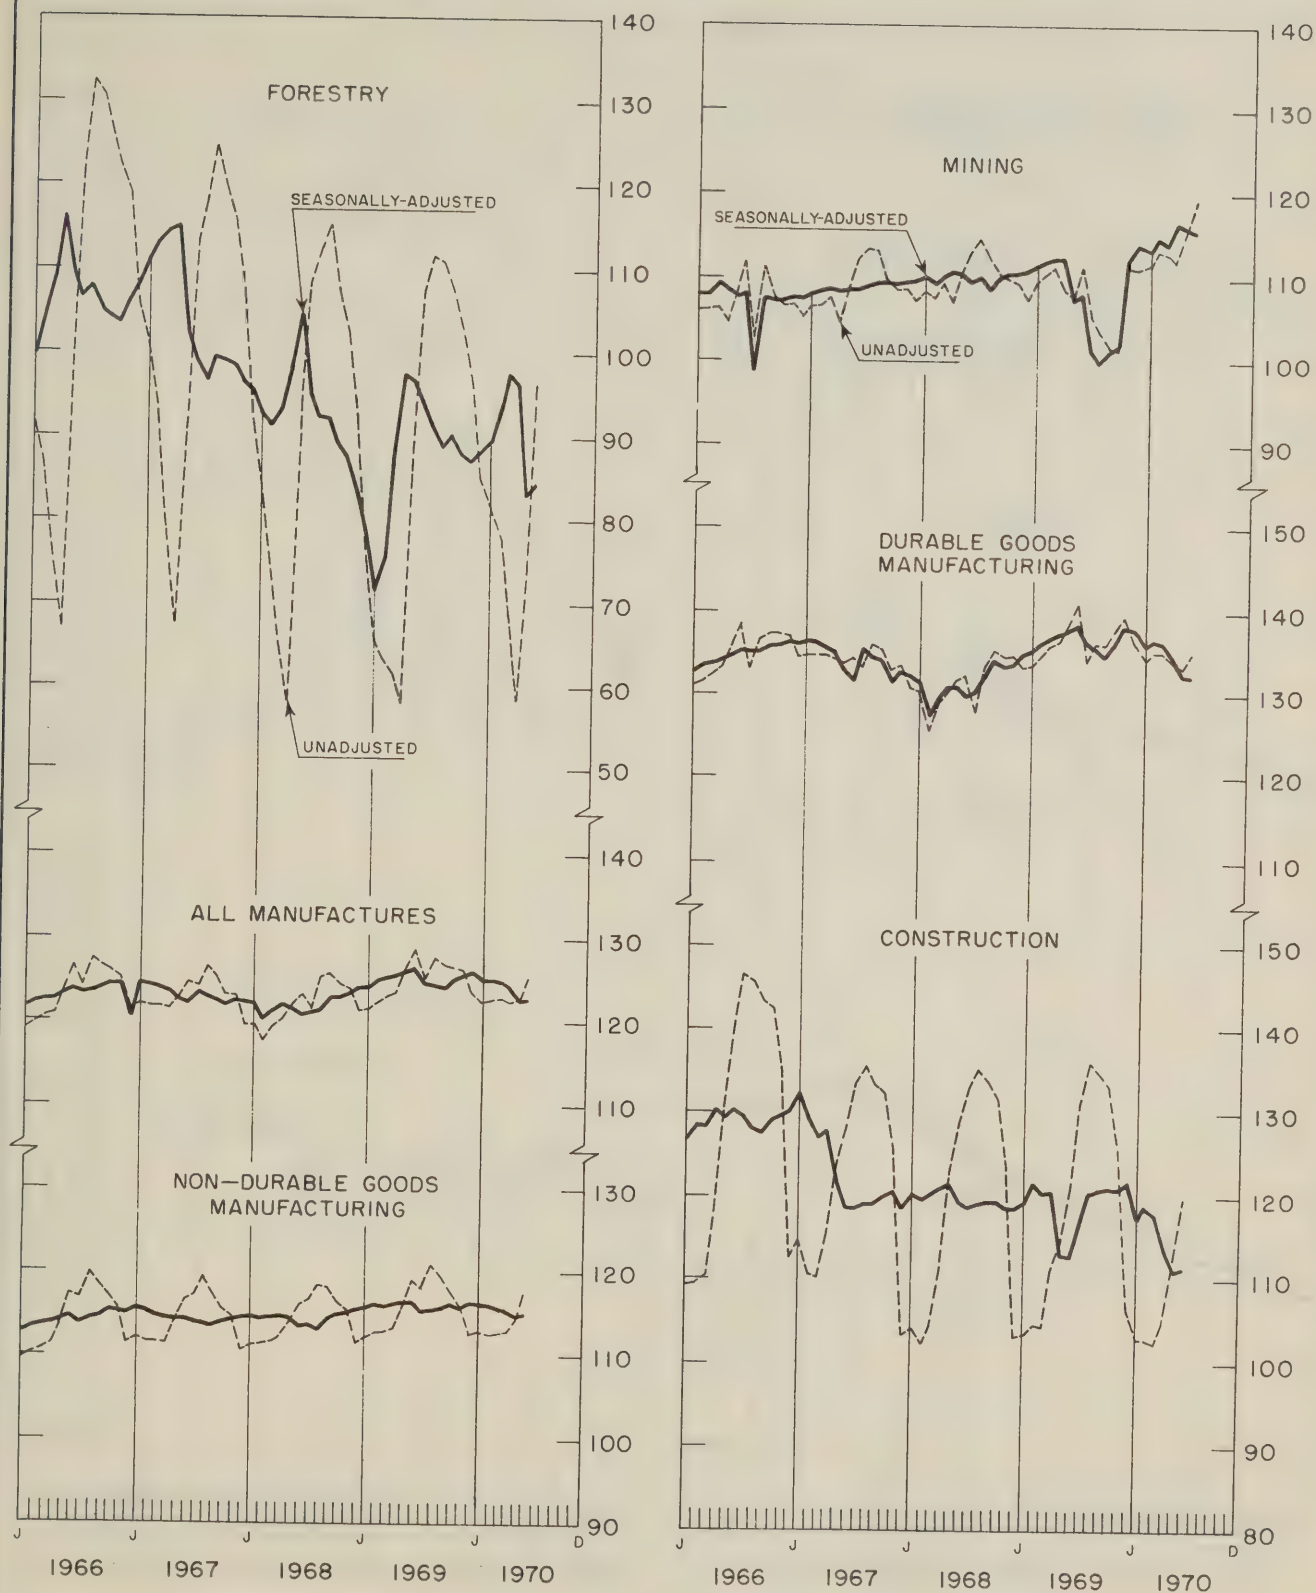

TABLE 8. Index Numbers of Employment, Payrolls and Average Weekly Wages and Salaries (1961=100), with Average Weekly Wages and Salaries in Dollars, Industrial Composite and Manufacturing, for Canada(1)

Year and month	Industrial composite				Manufacturing			
	Index numbers			Average weekly wages and salaries	Index numbers			Average weekly wages and salaries
	Employment	Aggregate weekly payrolls	Average weekly wages and salaries		Employment	Aggregate weekly payrolls	Average weekly wages and salaries	
		1961=100		dollars		1961=100		dollars

## NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

### The Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

### Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

### Definitions

#### Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

### Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

### Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

### Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

### Employment

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

### Average Weekly Wages and Salaries

The wages and salaries are derived from payrolls which include gross payments before deduction are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

### Organization of Data

#### The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

### Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year  
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year  
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$4.00 per year  
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year  
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$2.00 per year  
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50  
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50  
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents  
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents  
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-508 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents  
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).
- 72-510 - Labour Costs in Manufacturing 1968 - Price \$1.50 (Estimates of selected employer labour Costs, by industry group and area - Report prepared jointly by Labour Division of D.B.S and Economics and Research Branch of the Canada Department of Labour)

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

AUGUST 1970

The advance estimate of unadjusted composite index of employment (1961=100) indicates an increase in August over July 1970. Compared to the August 1969 index, the estimate was slightly lower. Among the industry divisions for which data are given in Table A, all industry divisions registered increases over the month, except mining, and finance, insurance and real estate which declined.

Seasonally-adjusted, the August composite index of employment showed no change from the preceding month. All industry divisions reported declines except construction and trade which showed increases. Regionally, employment increased in all regions except the Atlantic region which showed a drop.

Average weekly wages and salaries at the composite level were higher in August compared to July 1970. Increases were recorded in all industry divisions except trade and service, which registered declines.

For August 1970, additional industry and area details other than those presented in Table A are not yet available.

P Preliminary figures.

JULY 1970

**Employment** - The unadjusted index of employment for the industrial composite at 128.4 in July (1961=100) was down 1.0 per cent from the June 1970 level and was 0.5 per cent lower than in July 1969. Over the month, manufacturing, trade and service recorded declines. All other industry divisions showed increases ranging from 0.1 per cent in finance, insurance and real estate to 6.3 per cent in forestry. Among the regions, Quebec and Ontario registered declines of 1.5 per cent and 1.8 per cent respectively while the three other regions showed small gains.

Seasonally-adjusted, the industrial composite index of employment at 125.6 fell 0.7 per cent from the June 1970 level of 126.5. All industry divisions contributed to this decline except mining which recorded an increase of 1.0 per cent. All regions showed declines, the smallest 0.3 per cent being in Ontario and the largest 1.9 per cent in the Atlantic region.

Some of the major factors underlying the larger changes from June 1970 are presented in the footnotes to Table B.

TABLE B. Percentage Changes in Seasonally-adjusted and Unadjusted Employment Index Numbers for Canada and Regions, July 1970

Industry	Seasonally-adjusted	Unadjusted					
	Canada	Canada	Atlantic Region	Quebec	Ontario	Prairie Region	British Columbia
Forestry .....	- 0.4	6.3	5.2	2.9	3.4	13.2(2)	12.8(3)

Seasonally-adjusted							
Industrial composite .....		- 0.7	- 1.9	- 1.5	- 0.3	- 1.1	- 1.0

(1) Relatively few employees in this region.

(2) Increased activity.

(3) Termination of industrial dispute; also reduced activity last month due to fire hazard.

(4) Industrial dispute in saw, shingle and planing mills; some layoffs in other components.

(5) Termination of industrial dispute.

(6) Increase in activity.

(7) Industrial dispute.

(8) Greater than seasonal layoffs.

(9) Mainly motor vehicles; seasonal layoffs associated with model changeover.

(10) Seasonal increase in fish products and in fruit and vegetable canners and preservers.

(11) In both components.

(12) Mainly in hotels, restaurants and taverns.

**Note:** Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments each month. The latest figures throughout this publication are subject to revision.

Average Weekly Wages and Salaries - At the composite level, average weekly wages and salaries in July 1970 were \$127.01, a small decline from the June 1970 level of \$127.17. As compared to July 1969, average weekly wages and salaries rose by \$8.80 (7.4 per cent). Among the industry divisions, construction, trade, finance, insurance and real estate and service registered gains. Forestry, mining, manufacturing and transportation, communication and other utilities showed declines. Regionally, small increases in average weekly wages and salaries were recorded in the Atlantic region, the Prairie region and in British Columbia, whereas Quebec and Ontario registered declines.

Some of the major factors underlying the larger changes from June 1970 are presented in the footnotes to Table C.

TABLE C. Changes in Average Weekly Wages and Salaries for Canada and Regions, July 1970

Industry	Canada	Atlantic Region	Quebec	Ontario	Prairie Region	British Columbia
Forestry .....	- 0.59	0.81	1.04	- 0.90	- 8.20(2)	- 2.98(2)

Service .....	1.36	2.43(17)	0.88	1.36	1.88	0.74
Industrial composite .....	- 0.17	1.76	- 0.80	- 0.35	0.78	0.02

- (1) Relatively few employees in this region.
- (2) Increased employment of relatively low paid employees.
- (3) More hours worked this month.
- (4) Overtime payments.
- (5) Overtime payments last month.
- (6) Reduced hours worked.
- (7) Fewer hours worked in components where average weekly wages and salaries are below the average for transportation equipment; wage increases in some components.
- (8) Reduced employment of relatively low paid employees.
- (9) Fewer hours worked mainly in communications equipment; also overtime payments last month in another component.
- (10) Reduced overtime payments this month.
- (11) In men's and women's clothing; reduced activity.
- (12) Mainly due to industrial disputes in a component where average weekly wages and salaries are below the industry average.
- (13) More hours worked this month; some overtime payments.
- (14) Mainly in general contractors; short-time due to slow resumption of activity following the termination of industrial disputes.
- (15) In both components; overtime payments.
- (16) Mainly in other engineering; overtime payments.
- (17) Mainly in hotels, restaurants and taverns; some wage increases.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments each month. The latest figures throughout this publication are subject to revision.

## NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

### The Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

### Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

### Definitions

#### Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

### Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

### Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

### Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

### Employment

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

### Average Weekly Wages and Salaries

The wages and salaries are derived from payrolls which include gross payments before deduction are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

### Organization of Data

#### The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

#### Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year  
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year  
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$4.00 per year  
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year  
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$2.00 per year  
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50  
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50  
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents  
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents  
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-508 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents  
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).
- 72-510 - Labour Costs in Manufacturing 1968 - Price \$1.50 (Estimates of selected employer labour Costs, by industry group and area - Report prepared jointly by Labour Division of D.B.S and Economics and Research Branch of the Canada Department of Labour)

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

SEPTEMBER 1970

The September 1970 advance estimate of unadjusted composite index of employment (1961=100) indicates a decline from August 1970. Compared with the September index of last year, this advance estimate represents a downward movement.

Seasonally-adjusted, the composite index of employment for September shows a modest drop from August 1970. Among the industry divisions for which data are given in Table A, service, trade, finance, insurance and real estate, and construction registered small gains and the remaining industry divisions declines. Regionally, British Columbia, the Prairie Region and the Atlantic Region recorded increases whereas Ontario and Quebec, decreases.

Average weekly wages and salaries at the composite level were higher in September than in August 1970. All industry divisions recorded increases except trade and finance, insurance and real estate where small decreases occurred. All regions reported higher average weekly wages and salaries than in August 1970.

For September 1970, additional industry and area details other than those presented in Table A are not yet available.

AUGUST 1970

Employment - The unadjusted index of employment for the industrial composite at 130.4 (1961=100) in August 1970 was 1.4 per cent above the July 1970 level of 128.6 and 0.5 per cent below the 131.1 level reached in August 1969. Over the month, advances were recorded in manufacturing (3.5 per cent), construction (3.2 per cent), transportation, communication and other utilities (0.4 per cent) and service (0.3 per cent). The remaining industry divisions showed declines. All regions registered increases, the largest being 1.9 per cent in both Quebec and Ontario.

Seasonally-adjusted, the industrial composite index of employment in August at 125.9 was unchanged from the preceding month's level. The employment for most industry divisions was lower than in July 1970. Increases occurred in construction (1.3 per cent) and manufacturing (0.7 per cent). With the exception of the Atlantic Region where employment dropped 1.9 per cent, all the other regions registered increases.

Some of the major factors underlying the larger changes from July 1970 are presented in the footnotes to Table B.

TABLE B. Percentage Changes in Seasonally-adjusted and Unadjusted Employment Index Numbers from July to August 1970, for Canada and Regions

Industrial Composite .....		0	- 0.9	0.5	0.1	0.1	0.7

(1) Relatively few employees in this region.

(2) Reduced activity.

(3) Seasonal increase; also further resumption of activity following the settlement of industrial dispute in June 1970.

(4) Mainly in petroleum and contract drilling and in crude petroleum and natural gas.

(5) Industrial dispute.

(6) Increased activity; seasonal.

(7) Mainly in motor vehicles; return to work following lay-offs associated with model change over.

(8) Mainly in fruit and vegetable canners and preservers; seasonal.

(9) Mainly in women's and men's clothing; seasonal.

(10) In general contractors; industrial dispute.

(11) In both components.

(12) Mainly in general contractors; further resumption of activity following the settlement of industrial dispute.

(13) In highway and bridge maintenance.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments each month. The latest figures throughout this publication are subject to revision.

Average Weekly Wages and Salaries - At the composite level, average weekly wages and salaries in August 1970 were \$128.17, a rise of 0.9 per cent from July 1970 level of \$127.02 and 7.6 per cent from August 1969 level of \$119.07. Among the industry divisions, changes over the preceding month were increases in forestry, construction, mining, manufacturing and finance, insurance and real estate and decreases in service, transportation, communication and other utilities and trade. Average weekly wages and salaries were higher in all regions except the Atlantic Region where a decline occurred.

Some of the major factors underlying the larger changes from July 1970 are presented in the footnotes to Table C.

- (1) Relatively few employees in this region.
- (2) Reduced employment of relatively lower paid employees; also some wage increases.
- (3) Overtime payments this month; short-time last month.
- (4) Overtime payments.
- (5) Reduced employment in components where average weekly wages and salaries are below the industry average; also some wage increases.
- (6) More hours worked.
- (7) Reduced overtime payments in smelting and refining where wages are above the average for primary metal.
- (8) Wage increases; also some overtime payments.
- (9) Reduced employment of lower paid employees due to industrial dispute.
- (10) In shipbuilding and repairing; industrial dispute.
- (11) Increased employment in fruit and vegetable canners where wages and salaries are below the industry average.
- (12) Short-time last month; overtime this month; also some wage increases.
- (13) Mainly in general contractors; industrial dispute.
- (14) Mainly in general contractors; short-time last month.
- (15) In other engineering; increased overtime payments.
- (16) In both components; overtime payments.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments each month. The latest figures throughout this publication are subject to revision.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

## NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

### The Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

### Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

### Definitions

#### Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

### Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

### Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

### Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

### Employment

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

### Average Weekly Wages and Salaries

The wages and salaries are derived from payrolls which include gross payments before deduction are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

### Organization of Data

#### The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

#### Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year  
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year  
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$4.00 per year  
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year  
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$2.00 per year  
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50  
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50  
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents  
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents  
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-508 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents  
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).
- 72-510 - Labour Costs in Manufacturing 1968 - Price \$1.50 (Estimates of selected employer labour Costs, by industry group and area - Report prepared jointly by Labour Division of D.B.S and Economics and Research Branch of the Canada Department of Labour)

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

OCTOBER 1970

The advance estimate of the unadjusted composite index of employment (1961=100) for October indicates a decline from September 1970 and was lower than a year earlier.

Seasonally-adjusted, the October composite index of employment shows a slight loss from the previous month's level. Among the industry divisions for which data are given in Table A, employment dropped in all except trade which maintained the September 1970 level. British Columbia and the Prairie Region recorded small increases whereas decreases occurred in the remaining regions.

Average weekly wages and salaries for the industrial composite were higher in October than in September 1970. All industry divisions shared in the increase. All regions recorded gains except the Prairie Region where a small drop occurred.

For October 1970, additional industry and area details other than those presented in Table A are not yet available.

SEPTEMBER 1970

**Employment** - The unadjusted index of employment for the industrial composite at 129.4 (1961=100) in September was 1.1 per cent lower than in August 1970. In comparison with September of last year, the index was 0.9 per cent lower. Over the month, advances were recorded in trade and construction and the remaining industry divisions registered declines. Employment dropped in all regions, ranging from 0.1 per cent in British Columbia to 1.5 per cent in Ontario.

Seasonally-adjusted, the industrial composite index of employment in September at 125.9 was 0.4 per cent below the August 1970 level of 126.4. Forestry and construction recorded increases of 2.6 per cent and 1.7 per cent respectively. Manufacturing showed a decline of 1.6 per cent largely due to industrial dispute in motor vehicles. Mining registered a small decrease of 0.1 per cent. The remaining industry divisions displayed small gains. With the exception of Ontario where employment index fell 1.4 per cent, the other regions recorded increases ranging from 0.2 per cent in Quebec to 1.5 per cent in British Columbia.

Some of the major factors underlying the larger changes from August 1970 are presented in the footnotes to Table B.

Industrial composite .....		- 0.4	1.3	0.2	- 1.4	0.3	1.5

- (1) Relatively few employees in this region.
- (2) Seasonal decrease.
- (3) Increased activity.
- (4) Mainly in saw, shingle and planing mills.
- (5) Mainly in iron and steel mills; reduced activity.
- (6) Layoffs.
- (7) Seasonal layoffs.
- (8) Industrial dispute.
- (9) Industrial dispute affecting motor vehicles assembling and parts and accessories.
- (10) Mainly in shipbuilding and repairing; layoffs.
- (11) Mainly in fish products; a seasonal decline.
- (12) Termination of industrial dispute in the pulp and paper mills industry.
- (13) Mainly in general contractors; settlement of industrial dispute.
- (14) Increased activity in both components.
- (15) Seasonal increase mainly in department stores.
- (16) Layoffs of employees of the Pacific National Exhibition.

**Note:** Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

Average Weekly Wages and Salaries - At the industrial composite level, average weekly wages and salaries at \$128.97 in September were 0.7 per cent higher than a month ago and 7.0 per cent above the year ago level of \$120.49. Most industry divisions registered increases over August 1970, the largest being \$5.31 in forestry. Trade and finance, insurance and real estate showed decreases of 61 cents and 4 cents respectively. All regions experienced an increase in the average weekly wages and salaries over the month. These increases ranged from 51 cents in the Prairie Region to \$2.72 in the Atlantic Region.

Some of the major factors underlying the larger changes from August 1970 are presented in the footnotes to Table C.

Service .....	0.63	0.01	0.83	0.39	0.57	1.94
Industrial composite .....	0.86	2.72	0.86	0.44	0.51	2.00

- (1) Relatively few employees in this region.
- (2) Reduced employment of relatively lower paid employees.
- (3) Fewer employees in components where average weekly wages and salaries are below the average for mining; also some wage increases.
- (4) Reduced employment in a component where average weekly wages and salaries are below the average for primary metal; also overtime payments in a relatively higher paid component.
- (5) Mainly due to wage increases.
- (6) Mainly in shipbuilding and repairing, wage increases following settlement of industrial dispute.
- (7) Industrial dispute affecting higher paid employees.
- (8) Layoffs mainly of lower paid casual workers; also some overtime payments.
- (9) Reduced employment in a component where average weekly wages and salaries are above the industry average.
- (10) Less than full resumption of activity following settlement of industrial dispute.
- (11) Industrial dispute affecting part of the reference week.
- (12) Mainly in general contractors; settlement of industrial dispute; also more hours worked.
- (13) Mainly in other engineering; increased overtime payments.
- (14) In both components; reduced overtime payments.
- (15) Resumption of normal activity following settlement of Post Office strike.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

## NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

### The Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

### Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

### Definitions

#### Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

### Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

### Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

### Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

### Employment

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

### Average Weekly Wages and Salaries

The wages and salaries are derived from payrolls which include gross payments before deduction are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

### Organization of Data

#### The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

### Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year  
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year  
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$4.00 per year  
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year  
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$2.00 per year  
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50  
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50  
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents  
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents  
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-508 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents  
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).
- 72-510 - Labour Costs in Manufacturing 1968 - Price \$1.50 (Estimates of selected employer labour Costs, by industry group and area - Report prepared jointly by Labour Division of D.B.S and Economics and Research Branch of the Canada Department of Labour)

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

NOVEMBER 1970

The November advance estimate of the unadjusted composite index of employment indicated a drop from October 1970 and was lower than the level recorded in November 1969.

Seasonally-adjusted, however, the composite index of industrial employment showed no change from October 1970. Increases were recorded over the month in mining, finance, insurance and real estate and services and there were decreases in construction, manufacturing and trade. Quebec, the Atlantic Region and British Columbia registered slight gains whereas the Prairie Region and Ontario showed small declines in employment.

Average weekly wages and salaries for the industrial composite were slightly lower in November than in October 1970. The largest changes were a decline in construction and an increase in mining. The remaining industry divisions showed little change. All regions recorded declines in November.

For November 1970, additional industry and area details other than those presented in Table A are not yet available.

OCTOBER 1970

Employment - The unadjusted index of employment for the industrial composite (1961=100) was 128.6 in October, 1970. This was 0.8 per cent below the level of 129.6 reached last month and 1.1 per cent lower than the October 1969 level of 130.0. Forestry decreased by 8.3 per cent and trade increased by 1.1 per cent. All other industry divisions showed small declines.

Seasonally-adjusted, the industrial composite index of employment maintained the previous month's level of 126.1. Advances occurred in transportation, communication and other utilities (0.6 per cent) construction (0.5 per cent) and service (0.3 per cent). The remaining industry divisions showed decreases over the month, the largest being 4.8 per cent in forestry. Employment was up in British Columbia (1.9 per cent), the Atlantic Region (0.5 per cent) and the Prairie Region (0.3 per cent). Ontario and Quebec recorded drops of 0.2 per cent and 0.3 per cent respectively.

Some of the major factors underlying the larger changes from September 1970 are presented in the footnotes to Table B.

TABLE B. Percentage Changes in Seasonally-adjusted and Unadjusted Employment Index Numbers from September to October 1970, for Canada and Regions

Seasonally-adjusted							
Industrial composite .....		0	0.5	- 0.3	- 0.2	0.3	1.9

1. Relatively few employees in this region.
2. Layoffs mainly in logging, greater than seasonal except in the Atlantic Region.
3. Seasonal lay-offs.
4. Termination of industrial dispute in smelting and refining.
5. Mainly in communications equipment; reduced activity.
6. Layoffs in fruit and vegetable canning; seasonal.
7. Seasonal layoffs in fruit and vegetable canning and in fish products.
8. Mainly in general contractors; increased activity.
9. Seasonal layoffs in both components.
10. Mainly in highways, bridges and street; seasonal.
11. In highway and bridge maintenance.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

Average Weekly Wages and Salaries - Average weekly wages and salaries at the industrial composite level rose 1.0 per cent from \$128.94 in September to \$130.23 in October 1970. All industry divisions recorded higher average weekly wages and salaries except construction and trade which were virtually unchanged. All regions experienced higher average weekly wages and salaries in October.

Over the year the gain in average weekly wages and salaries for the industrial composite amounted to \$9.52 (7.9 per cent). Increases for the industry divisions were \$19.48 (12.3 per cent) in construction; \$15.68 (10.2 per cent) in mining; \$13.18 (9.6 per cent) in forestry; \$9.92 (7.9 per cent) in manufacturing; \$9.25 (6.8 per cent) in transportation, communication and other utilities; \$8.54 (7.5 per cent) in finance, insurance and real estate; \$6.17 (6.5 per cent) in trade and \$7.35 (8.7 per cent) in service.

Some of the major factors underlying the larger variations from September 1970 are presented in footnotes to Table C.

1. Relatively few employees in this region.
2. Reduced employment of relatively lower paid employees.
3. More hours worked this month.
4. Wage increases and some overtime payments.
5. Overtime payments last month in a component where average weekly wages and salaries are above the average for primary metals.
6. In smelting and refining; wage increases following the settlement of industrial dispute.
7. In shipbuilding and repairing; fewer hours worked.
8. Mainly in men's clothing. Reduction of lower paid employees.
9. Reduction of lower paid employees and more hours worked in a component where wages are above the industry average.
10. Further resumption of activity following the settlement of industrial dispute last month.
11. In both components; fewer hours worked.
12. In other engineering; increased activity.
13. Increased employment in a component where wages are higher than the industry average; also overtime payments in some components.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

## NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

### The Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

### Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

### Definitions

#### Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

### Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

### Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

### Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

### Employment

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

### Average Weekly Wages and Salaries

The wages and salaries are derived from payrolls which include gross payments before deduction are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

### Organization of Data

#### The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

#### Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year  
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year  
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$4.00 per year  
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year  
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$2.00 per year  
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50  
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50  
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents  
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents  
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-508 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents  
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).
- 72-510 - Labour Costs in Manufacturing 1968 - Price \$1.50 (Estimates of selected employer labour Costs, by industry group and area - Report prepared jointly by Labour Division of D.B.S and Economics and Research Branch of the Canada Department of Labour)

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

DECEMBER 1970

The advance estimate of the unadjusted index of employment for the industrial composite indicated a drop in December over November 1970. It was also lower than the level recorded in December 1969.

Seasonally-adjusted, however, the composite index of employment showed an improvement over November as increases were recorded in mining, manufacturing and service which were partly offset by decreases in construction, trade and in finance, insurance and real estate. All regions experienced gains in their seasonally-adjusted composite index of employment.

Average weekly wages and salaries at the industrial composite level were lower than a month ago. This was mainly the result of short-time associated with the year-end holiday season. All industry divisions recorded declines except trade and finance, insurance and real estate and service which showed small gains. Average weekly wages and salaries were lower than in November in all regions.

For December 1970, additional industry and area details other than those presented in Table A are not yet available.

NOVEMBER 1970

**Employment:** - The November unadjusted index of employment for the industrial composite (1961 = 100) at a level of 127.6 was 1.0 per cent lower than 129.0 reached in October 1970. This was also below (1.9 per cent) last year's level of 130.1. Most industry divisions recorded declines from October 1970. Larger changes were decreases of 7.9 per cent in forestry; 6.2 per cent in construction; 1.6 per cent in service; 1.5 per cent in manufacturing and a 2.2 per cent increase in trade. All regions experienced declines in employment ranging from 0.4 per cent in Ontario to 2.2 per cent in the Atlantic Region.

Seasonally-adjusted, the composite index of employment showed a decline (0.3 per cent) from the previous month's level. The only industry divisions to record gains in employment were service (0.7 per cent) and finance, insurance and real estate (0.3 per cent). Mining maintained the October 1970 level and the remaining industry divisions experienced declines. All regions recorded declines except Quebec where employment was unchanged and British Columbia where it increased 0.4 per cent.

Some of the major factor underlying the large changes from October 1970 are presented in the footnotes to Table B.

TABLE B. Percentage Changes in Seasonally-adjusted and Unadjusted Employment Index Numbers from October to November 1970, for Canada and Regions

Industry	Seasonally-adjusted	Unadjusted					
	Canada	Canada	Atlantic Region	Quebec	Ontario	Prairie Region	British Columbia

(1) Relatively few employees in this region.

(2) Seasonal decline in activity; layoffs.

(3) Greater than seasonal layoffs.

(4) Industrial dispute; also seasonal layoffs.

(5) Mainly in saw, shingle and planing mills; seasonal.

(6) Mainly in shipbuilding and repairing; seasonal.

(7) Reduced activity involving layoffs.

(8) Industrial dispute.

(9) Mainly in fruit and vegetable canning and in fish products; seasonal.

(10) Mainly in general contractors; seasonal layoffs.

(11) Layoffs in both components but relatively larger in highway, bridges and streets; seasonal.

(12) Mainly in department stores and variety stores; seasonal.

**Note:** Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

Average Weekly Wages and Salaries. - Average weekly wages and salaries for the industrial composite were down \$0.31 (0.2 per cent) in November from \$130.22 reached in October 1970. In comparison with the month of November last year, average weekly wages and salaries were higher \$8.49 (7.0 per cent).

Over-the-month, increases in mining, manufacturing, finance, insurance and real estate and service were more than offset by decreases in construction, forestry, transportation, communication and other utilities. Average weekly wages and salaries declined modestly in all regions.

Some of the major factors underlying the larger changes from October 1970 are presented in the footnotes to Table C.

- (1) Relatively few employees in this region.
- (2) Short-time worked this month due to seasonal decline in activity.
- (3) Reduced employment in relatively lower wage components of mining.
- (4) More hours worked this month.
- (5) Reduced employment of lower paid employees mainly in saw, shingle and planing mills; also due to increased hours worked in veneer and plywood mills.
- (6) Fewer hours worked this month.
- (7) Mainly in shipbuilding and repairing; layoffs of relatively lower paid employees.
- (8) Industrial dispute in a component where average weekly wages and salaries are below the industry average.
- (9) Reduced employment of lower paid employees in fish products and fruit and vegetable canning; also due to fewer hours worked.
- (10) In both components; decline in activity in the form of layoffs and fewer hours of work.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of the reporting establishments in each month. The latest figures throughout this publication are subject to revision.

## NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

### The Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually, employing 15 or more" criteria that was formerly used.

### Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

### Definitions

#### Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

### Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

### Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

### Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

### Employment

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

### Average Weekly Wages and Salaries

The wages and salaries are derived from payrolls which include gross payments before deduction are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions; payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

### Organization of Data

#### The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

### Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.
